WHY CHOOSE CAN-AM ACCESSORIES?

QUALITY & SEAMLESS INTEGRATION.

It's that simple. We design and build industry-leading ATVs and SSVs, so no one is more qualified to create their accessories. Our commitment to innovation, high-quality materials and seamless integration ensures that those made by Can-Am for Can-Am vehicles have an edge the other makers don't. They fit in and fit right, look great, and are made to last. Only Can-Am accessories can truly make it your Can-Am.

TRUST & RELIABILITY.

It's built into every thing we make, even the warranty. It's why off-road enthusiasts trust Can-Am accessories. It only makes sense because when you buy and install genuine Can-Am accessories at the time of vehicle purchase, you get the same manufacturer's limited warranty*. We don't take that responsibility lightly; labor is covered, along with any collateral damage that the failure of a warranted accessory might cause to your vehicle.

We build them - we back them. Which is why for generations you've trusted us to get you there, and you know you can trust us to keep you going.

PERFORMANCE & PERSONALITY.

Nothing beats Can-Am. It's the very essence of power, performance, freedom and versatility driven by unrivalled quality and reliability - singlehandedly able to quench your thirst for adventure, while satisfying the need to get things done. And nothing beats our comprehensive collection of customized accessories designed to enhance the Can-Am experience and get the most out of every mile of trail and every job. **Can-Am Accessories – Because where there's a will, there's a way.**

LIKE YOU, WE BELIEVE THAT ANY JOB WORTH DOING IS WORTH DOING WELL.

You get that sly smile any time someone asks you what you do. “*Everything*” is the answer you should give. But you’re not in it for the glory, you’re in it for the rush you get from finishing one more job they said couldn’t be done in a day, or couldn’t be done at all. Because “*done right*” is what every job should be about.

CROSS HELMETS

For warmer riding conditions and more active riding, you might want to opt for a cross helmet with goggles. In highly active riding where you will be sweating and breathing hard, goggles are the best solution for clear vision, and the extra open area will keep you from overheating.

TECHNICAL WEAR

WHAT'S UNDER THE SHELL COUNTS

To keep warm, you've got to keep dry. Our technical base and mid layers wick perspiration away from your skin where it can evaporate quickly for all-day warmth.

HOW IT WORKS

Each layer has a function. You get the best performance and versatility when you dress in a system with base layer, mid layer and outer layer.

OUTER LAYER

Keeps wind and water out. Adds insulation for warmth.

MID LAYER

Dials in your warmth level. Add or remove during the day as conditions change.

BASE LAYER

Close to the body to wick perspiration and prevent chills. Adds warmth. Avoid cotton — it gets wet and stays wet.

BASE LAYER

YOU ARE AN INTENSE, ACTIVE RIDER, WHICH CAUSES YOU TO SWEAT.

MEN'S ACTIVE BASE LAYER

- X-STATIC¹ enhanced through to the fiber to thermodynamically regulate your temperature by conducting body heat out in warm weather and reflecting body heat back to the skin in cold weather.
- Permanently treated for long-lasting antibacterial performance undiminished even after 250 washes.
- Silver woven into fiber immediately binds with odor-causing agents such as ammonia and denatured proteins to instantly reduce odor.
- Mesh panels in specific areas for better ventilation and accelerated drying.
- Compressed for added comfort.

HOW TO MEASURE

- For best results, have someone else take measurements.
- Measure body in underwear.
- Tape must be snug but not tight.
- If measurements fall between two sizes, order the larger size.

Chest/Bust: Measure under your arms, around the fullest part of your chest.

Waist: Measure around your natural waistline, keeping one finger between the tape and body.

Gloves: Measure palm width.

Inseam: Without shoes, from crotch to the floor.

Arm length: Hand on hip, from center back neck bone, along shoulder point round elbow to bottom of wrist bone.

Head: Around your head, from the center of the forehead, above the ears and over the natural bump at the back of the head.

GOES FAR.

XPS - Think of it as your first line of defense against engine and vehicle component wear. There's an XPS product that cleans, another that lubricates, or stabilizes, some that cool and yet others that extend life.

Some do only one, others more, but whatever they do they do exceptionally well. And they all provide complete peace of mind where it matters most. Out there.

AFTER ALL, YOU ONLY GET OUT WHAT YOU PUT IN... SO IF YOU'RE CHOOSING ANYTHING OTHER THAN XPS, THEN YOU'RE NOT PUTTING INTO YOUR CAN-AM WHAT YOU EXPECT TO GET OUT OF IT. THE ABSOLUTE BEST.

XPS. MORE THAN JUST OIL.

VEHICLE MAINTENANCE: TIPS YOU NEED TO KNOW.

Your Can-Am is built tough, built to last and designed to let you ride it hard. But even the toughest machines need attention. To make that easier, we've compiled a list of quick, common-sense maintenance tips that'll go a long way to making each moment you ride as enjoyable, or productive as it is worry-free. It's easy, really. Caring for your Can-Am vehicle shouldn't take more than a few moments – if you do it at the right time.

<p>Check your tire pressure and condition. Keep your tire pressure within the operator's guide specifications.</p>  <p>Tire P. 181</p>	<p>Make sure your air filter is clean.
